

# SMART DIGITAL ACCESS

**DISCOVER  
THE TECHNOLOGY  
THAT SECURES  
YOUR BUSINESS AND  
YOUR PEACE OF MIND**

- Allows all security components to be located behind attractive wood, glass or brick displays and out of public view.
- Uses variety of communication technologies to send security alarms anywhere anytime.
- Allows for easy tracking of employee time and attendance.
- Gives control to management, not locksmiths, when access changes are needed.
- Signals when cabinets and fixtures have been left open.
- Uniquely controls each employee's access to all or specific locations.
- No need to touch case with key to gain access, protecting finishes on fixtures.
- Integrates with Closed Circuit TV and DVR systems.

## Smart Digital Access

Smart Digital Access is the gateway to enhanced customer engagement, allowing sales associates the ability to maintain eye contact when unlocking cases, no stumbling around for the right key, just a simple card swipe and the case unlocks. Smart Digital Access uses advanced digital and radio-frequency identification (RFID) technology to help retailers work smarter and more securely as they engage consumers, while at the same time collecting key business intelligence history of all accesses attempted and granted for analysis by Loss Prevention, Merchandising and other departments.

Security is an issue that all companies must address. How do I secure the building?  
How do I secure cabinets and fixtures? Who will have access to merchandise and when?  
How do I notify someone of a security breach? Can I show a security audit trail to management?

5Stat couples its complete line of comprehensive access control products with the business's own IP-based computer network to incorporate everything under one information technology architecture, allowing a business to manage doors, cabinets and fixtures from any computer connected to the Internet. Simplified implementation and maintenance means better security control, allowing your business to put its focus on building customer engagement.

5Stat's complete line of comprehensive access control products serves single fixture to fully integrated multi-location needs, utilizing:

- 5Stat's premier relationship with designing and installing Hafele's Dialock product line.
- 5Stat's Incompass product line, which incorporates digital access with RFID passive enabled item level track and trace.
